## What people are saying

### From Trans Survivors

"Wow! This was really delightful and calming. I think being here will improve my ability to care for my mental health. Good variety of techniques and skills."

"I always attend FORGE workshops when I go to conferences. I even brought friends and partners this time!"

"I forgot my anxiety meds - this workshop helped me to stay focused and positive for the entirety of the conference."

"Thank you for making the information about the training public. That way I can know as a trans survivor that I am not alone, and that other professionals are being trained somewhere in the world."

### From Providers

"As I put together some slides on oppression, I am appreciating this email from you (again). I think I have referred to it and pulled it out about ten times since you sent it."

"I am awed by your skills. Only you have the range of skills, depth of experience, sensitivity and flexibility to pull off what you did for us. You REALLY get us. And we really get that you get us...that's why the response to your training from each county has been overwhelmingly enthusiastic."

"Using some resources from FORGE for a training I am prepping. Just needed to tell you how much you folks rock! No really - ROCK!"

"That was an amazing two days of facilitation. It was a really rich experience...and I appreciated the variety of activities and learning styles."

"That was a phenomenal webinar! ...Thank you so much for your informative, accessible, and valuable presentation."

"I have been soooo impressed with all of your materials and have been sending links to many of your webinars to my colleagues and partners on campus and inviting them to view them with me. It's great to have these powerful resources so readily available. Thank you."
