

2021 Year In Review

During the second year of the COVID pandemic, FORGE continued to provide stable -- and responsive -- services to trans/nonbinary survivors and loved ones. The team at FORGE and our partners were agile and creative in offering extensive training and technical assistance to service providers across the country. Since 1994, FORGE has reduced the impact of trauma on trans/non-binary survivors and communities by empowering service providers, advocating for systems reform, and connecting survivors to healing possibilities.
